COURSE METHODOLOGY

Apart from getting a basic foundation of Project Management, the participants will experience the concepts and ideas in an interactive setting. As the saying goes, "The Learning is in the Doing". The delivery will be activity based so that the manifestation of learning's takes place rapidly.

A unique feature, participants will enjoy is a multi-sensory delivery that utilizes a wide range of tools to appease an equally wide range of learning styles. Peter's training sessions are known to be impactful, appealing to both the intellectuals and the action-based learners.

INDUSTRY OVERVIEW AND COURSE DESCRIPTION

Organizations regularly promote engineers who are competent and well qualified in their technical field. The engineers assume their new position as a project manager without the specific enhancement of leadership or project management skills. These new managers consequently become ineffective as they undergo the transition which often leaves them frustrated and unmotivated.

This workshop will provide the knowledge and tools needed for engineers to understand the transition from the role as an engineer to function successfully as a project manager. It exposes them to the fundamental of general managerial skills, project management skills and equips them with new capabilities to ensure smooth transition into their new post.

WHY YOU CANNOT MISS THE EVENT

Today, almost every industry employs Project Management Practitioners. In fact, companies reported that "the first step to achieving a good ROI is professional project planning and implementation" when they ranked Project Management as the top desired skill in the Global Knowledge-Tech Republic 2010 Salary Survey.

Knowing the above, enhancing your skills in the transition to project manager is a must and will contribute positively in your daily work with higher efficiency and better results. With the many facets of this course, participants will gain a hands-on approach on to become competent project manager.

WHO SHOULD ATTEND THIS EVENT

This training will benefit project managers who have been appointed to a respectable project to manage but without formal training in team leadership or project management. Engineers, assuming roles as team leaders in projects or want to go into project management. Engineers who are already working in projects and want to step up into a management role.

EPC Engineers / Technical Directors / Procurement / Project Managers

From: EPCC / EPCM / Engineering Services / Oil and Gas / Chemical and Petrochemical / Power and Utilities / Process Industries / Steel / Mining / Heavy Industries

CLIENT'S TESTIMONIALS

"Good exposure, sharing & beneficial "

- Senior engineer
- MMC ENGINEERING SERVICES

"Good and useful for our organisation"

- Q&M manager
- CYPARK RESOURCES BERHAD

"Training is good, suites my daily works, requirement. Example given are based on real working life. "

- Site manager
- THALES MALAYSIA SDN BHD

"Excellent "

- Tooling manager
- SPIRIT AEROSYSTEMS MALAYSIA SDN BHD

"Good training & well explained "

- Senior process engineer
- UPECA FLOWTECH SDN BHD

"Good Knowledge sharing from facilitator"

- Deputy layout & piping manager
- TOYO ENGINEERING SDN BHD

PETER WYSS, PMP

Peter Wyss is the founder and CEO of SUMMIT SOLUTIONS, a subsidiary of PMCC-INTERNATIONAL Sdn Bhd which is providing complete solutions for project management. He graduated with a Bachelor of Science degree in Electronics and a MBA from College of Bern, Switzerland. He has several post - graduate qualifications such as Diploma in Project Management, Coach Certification (ICF), NLP Practitioner and Excellerated Business School for Entrepreneurs. His latest achievement is the pathway into Agile Project Management as a certified Scrum Master.

Peter has accumulated a wide range of experience from different industries, working at senior positions in Telecom RF-Sales, Industrial and Medical electronic development, as well as Training and Coaching of electronic engineers based on the Swiss government curriculum. After a consulting assignment for project management at Siemens Switzerland, his international career started in Malaysia. Here he gained his credibility in the Railway industry in several projects and roles.

Peter ventured into the Project Business already in his twenties and gained a lot of experience in different projects for more than 20 years and finally started his own business in 2007 in Malaysia. After a number of training, coaching and consulting assignments in Kuala Lumpur, Singapore, Bangkok, Manila, Shanghai, Dubai, Jeddah, and Jakarta, Peter brought the 3rd large and complex project in Malaysia to successful completion, while working on project based assignments as PMC or Project Management Facilitator.

Continuing the journey as an entrepreneur, Peter expanded his business into Renewable Energy and Power Plants, where he obtains a multi-project management function throughout South East Asia for a multinational company.

Taking Peter's experience from the engineering and infrastructure projects and blend it with his training and consulting skills results in high value outcomes for the customers or course participants. Additional to that, Peter has published a number of Best Practise white papers and blogs which are available on his website.
